# 1. Email Signing In Thunderbird Mail

## 1.1 Pre-requisites

1. Token driver is installed.
2. Certificate is enrolled inside token.
3. Thunderbird Mail applications.

## 1.2 User guide to digitally sign email using Thunderbird Mail.

1. Plug in token. Open Thunderbird Mail.
2. On the menu, click **Option > Account Settings**.
3. Choose Security. For digital Signing, Click **Select**.
4. In **Password Required**, enter the token password.
5. Click **OK**.

6. Select **Certificate** and Click **OK**

7. This message appears. Click **No** since this certificate is not for encryption

8. Your certificate is chosen. Optional: Tick **Digitally sign messages (by default)** to digitally sign mail by default.

9. Click **OK**

10. Open a new mail window.
11. Click **Security**, Tick **Digitally Sign This Message**.
12. Compose your mail and send it. Successfully, Your message is signed using digital signature certificate.

\*\*\*\*\*

Basic description for how to sign email using a certificate-based digital ID to allow others to sign using a certificate in Thunderbird Mail Version 38.5.1 or above.
